(54) Title: ANTENNA DEVICE

WO 2004/008574 A1

(57) Abstract: An antenna device for a portable radiocommunications apparatus, a so-called cell or mobile telephone, has a carrier (4) produced from electrically insulating and non-magnetic material. The carrier (4) is fixable on a circuit card (1) in the mobile telephone and supports a radiator (5). The radiator has a contactor device (15) for contact with a corresponding contactor device on the circuit card (1). The carrier (4) has an accommodation space (10) in which an anchorage portion (3) on the circuit card (1) is insertable and fixable. The radiator (5) is disposed on the distal end of the carrier (4) seen from the circuit card (1).
